About myself

I am engaged in Front-end development, layout from 0 and write a little Back-end on Node.JS

Front-end: React.js, Redux, axios, JavaScript, Styled components, material-UI, NEXT..JS

Back-end: Node.js (express.js, Next.js, MongoDB)

I am good at layout, I use BEM preprocessors (Scss, Sass, Less), only PixelPefrect.

In my spare time I enjoy React-native

I am using Gulp, Webpack for building. NPM package managers, composer

I use Git to publish projects on GitHub, GitLab

Languages: Russian-Fluent. English-speaking, reading literature and documentation
